Subject: FW: Long Term Monitoring Strategy Funding

David, just left you a VM on this topic.

Do you know the projected cost for this? My assumption was that all the contract dollars we've received recently from OEM was for the mine stabilization (and water treatment). The estimates we gave HQs excluded any long term monitoring costs and I just want to be sure everyone's on the same page of the reality of our funding needs regarding any conversations around funding with HQs.

Thanks,

Joe

All. I just spoke with David Ostrander and he is prepared to move forward to contract the work

for the one-year GKM monitoring program and he has assigned an OSC for this task. He has it covered his ER/Removal budget. It appears to me that the funding decision has been made. Any objections?

Joan
